# Why UCC?

Integrating business communications improves collaboration among knowledge workers. From a single interface, teams can become more efficient through improved connectivity.

Enjoy simplified network, security, and administration.

**Unified communications and collaboration** (UCC) components include:

- Video conferencing
- Instant messaging (IM)
- Email
- Calendars and scheduling
- Telephony
- Voice Mail
- Desktop sharing
- Presentations

*Working smarter, working together* [SM]

# Business Services

### DATA
Onsite, cloud or hybrid. Accelerated cloud access. Analytics with actionable insight. Make data-driven decisions.

### VOICE
Telephony and voice chat. Intelligent assistants provide natural, handsfree communications.

### COLLABORATION
Deliver projects on-time and on on-budget. Co-edit and share documents, workspaces across projects.

### NETWORK
Scalable, reliable services across wired and wireless. Network switches, routers, firewalls, storage.

### SECURITY
Information security protects against malware, ransomware, injection, broken authentication, and sensitive data exposure.

### CUSTOM SOLUTION
Everything you need, nothing less. Integration with legacy and cloud-based applications. Smart websites with mobile apps.
